Socks are in demand

Socks are the #1 requested item at homelessness centres globally. And they're in short supply.

How socks help

Many people living on the street rarely take their shoes off, making socks a much-needed item. Painful foot problems are made worse if people don't have decent socks. A pair of new, clean socks can make a world of difference.

Choosing socks

At Uniting WA, we welcome donations of new socks for men, women and children in all sizes. People tend to prefer white sports socks over dark colours, but we welcome all socks equally.

How to donate

Bring new pairs of socks to your school, church or workplace and we'll make sure they go to people who really need them.

Everyone deserves to have cosy toes.
